# *Biik Ganyin datbu* CARING FOR COUNTRY

## ABOUT US

Biik Land Management is the Natural Resource Management unit of the not-for-profit organisation the Taungurung Land and Waters Council (TLaWC), operating within the Taungurung Registered Aboriginal Party (RAP) boundaries.

Biik includes Traditional owner objectives in project delivery. Our service model implements innovative land management practices that integrate traditional knowledge and science, with strong connections to community input. We work to heal and revitalise Country while recognising and honouring the intrinsic connection between people, place and landscape.

Our team has extensive management experience planning and applying works across Australia in both the public and private sectors. Biik values and maintains strong partnerships with Victorian Government Departments and Agencies. Our unit undertakes a wide variety of services (as listed on the reverse) and would happily discuss your individual needs to see how we can best provide service.

To work on behalf of Taungurung people on Taungurung land,  
in ways that enable the custodial rights and responsibilities to care for Country.
